

CITIZENFUND

Investment policy

Citizenfund aims to provide financial support, through private savings and those of legal entities, to companies whose social and/or environmental impact is concrete and proven. The special feature of Citizenfund is that the final decision on funding is left in the hands of the members of our citizen investment cooperative: any project that receives a majority of the votes cast (50% + 1 vote) is funded.

All entrepreneurial projects presented to the cooperators for validation must comply with the following criteria:

- *Have a real social and/or environmental impact*
- *Adopt a societal approach by adopting a circular, collaborative and/or cooperative economic model.*
- *Be financially self-supporting in the medium term (3-4 years)*
- *Focusing on social and societal performance over economic performance*
- *Adopt an operation that is respectful of others and the environment*
- *To treat the various stakeholders (employees, customers, suppliers, etc.) honestly, responsibly and fairly.*
- *Have limited wage pressure*
- *To provide an economic or social advantage to the cooperators*
- *Commitment to transparent communication about its activity and developments*
